

EARTH DAY 23

LOVING GOD'S CREATION

St. Stephen's Church 22nd April 2023 2-7pm

St. Stephen's Church, West Bowling is hosting an afternoon to explore how climate change affects our local area and what we can do to make a positive change. It will be a fun, fact filled afternoon. There will be a talk, art activities, support making pledges, writing to community leaders and prayer.

FREE EVENT

St. Stephen's Church was built over 160 years ago, like many churches it is now having to look at how it can develop to be a place that is better suited to the current climate challenges. We believe the best way to take on such a big challenge is in fellowship and prayer.
